PROJECTS

URBANUTOPIA STORE ANALYSIS USING EXCEL: | [Excel]

May 2022

- Created a comprehensive analysis of the UrbanUtopia store which is E-Commerce Store using Excel, showcasing my data analysis skills. utilized Excel's powerful features, precisely examined various aspects of the store's performance, including sales trends, inventory management, and customer demographics. Utilized functions such as pivot tables, charts, and conditional formatting. Also, derived valuable insights that informed strategic decision-making.

PERSONAL PORTFOLIO WEBSITE: | [HTML, CSS]

Feb 2023

- Developed a Responsive personal portfolio website which is a visually appealing online space that presents my professional identity. It is built by using HTML, CSS and JavaScript which showcases my skills, achievements, projects and experiences. This website typically includes a portfolio section featuring notable projects along with my resume and contact details.

AMAZON PRIME VIDEO DASHBOARD: | [Power BI]

Aug 2023

- Created Dashboard which showcased my proficiency in data visualization and data analytics through the creation of an Amazon Prime Video dashboard using Power BI. This project demonstrates my ability to extract meaningful insights from complex data sets and present them in a visual manner by leveraging Power BI's robust features.

SURVEILLANCE ROBOT: | [Arduino Uno, Esp-32 Cam, L298N Driver, Servo Motors]

March 2024

- Developed a surveillance robot .This innovative robot is powered by Arduino Uno, equipped with an ESP-32 Cam for real-time video streaming, and driven by an L298N motor driver. The integration of servo motors allows for precise control of the robot's movements, ensuring optimal navigation by capturing various images.
